

WEATHERHIDE®
100% Acrylic Exterior

Microban is a registered trademark of Microban Products Company.

DAVIS PAINT
PREMIUM QUALITY

Visible Cleanliness

In areas with extreme moisture and humidity, mold and mildew can grow over time on unprotected painted surfaces. For exterior applications, Microban® technology provides a more visible improvement in product cleanliness.

For example, on the two dried paint surfaces below you can see how Microban® protection works to inhibit the growth of mold and mildew on the film. While on the unprotected surface, mold and mildew quickly multiply and grow.
